

# Yale Fire Security Safes

“Fire & Security protection for complete peace of mind”

This Yale Fire Security Safe is equipped with a unique digital security keypad with many user functions and features. A scramble number input enables personal codes to be hidden within longer sequences of numbers. Whilst additional access codes can be set for one time use. This state-of-the-art safe has been carefully designed to be worthy of your confidence and the Yale brand name.

 SP Fire Resistance Certificate – Issued by SP Technical Research Institute of Sweden, on 1 hour fire protection for documents. The internal temperature will not exceed 100°C at an external temperature of 927°C.

 Sold Secure Certificate – Issued by Sold Secure which is an independent test house for security products in England with a security level of Silver.

## Designed to keep you cool

Like every Yale quality assured product, the new range of Yale Fire Safes has been designed with your peace of mind in focus. The entire range has been built and thoroughly tested to withstand intense heat and humidity, resist attack, leaving you the knowledge that your most precious documents are in good hands.

Two types of highly resistant safe-boxes guarantee a high level of protection and fire resistance. The Yale Fire Safe for Documents protects your passports and all precious paper documents. The Yale Data Fire Safe contains an additional "safe within a safe" insulation layer. This protects extra sensitive digital data, whether they are on an external hard-drive, on CD ROMs, DVDs or tapes.

All Yale Fire Safes are thoroughly tested, both in our internal labs and with independent external testing institutes to withstand extreme temperatures and humidity. A fire test is performed in a furnace where the safe is brought up to a temperature of 927 degrees – simulating the extreme temperatures that occur under a house fire. The Yale Fire Safes are built with the latest technology in fire insulation which gives excellent protection and allows more room for your valuables inside your safe due to the thinner wall thickness.
